Publisher Berger-Levrault, an international leader in software publishing, deploys its EAM/CMMS offering in Germany with its new partner Axino

Already present in Belgium, Italy, Spain, Switzerland, Morocco, and Canada, the Berger-Levrault Group continues the international deployment in Germany of its EAM/CMMS offering by its subsidiary CARL Berger-Levrault.

The publisher announces the signing of a partnership with Axino Solutions, an international consulting and IT company, and an expert in equipment management solutions for businesses. It is going to distribute CARL Source's CMMS/EAM software to help medium-sized companies in all sectors to optimize the management, profitability, and life cycle of their equipment.

"We are pleased to collaborate with Axino's CMMS experts and to entrust them with the deployment of our CARL Source CMMS on the German market. This partnership reinforces our ambition to become a major international leader in software publishing," says Tugdual Le Bouar, Chief Operating Officer at the Berger-Levrault Group.

"The partnership with the Berger-Levrault Group is an interesting development of our existing CMMS; indeed, with CARL Source and its suite of innovative equipment maintenance and management solutions and its advanced Technical architecture, we can now offer our clients a solution that meets the needs of medium-sized companies," explains Michael E. Wallrath, General Manager of Axino Solutions.

About Axino Solutions

Axino Solutions GmbH, part of the S&T Group, is a leading provider of communication solutions and services with distinctive expertise in the automation and digitization of operational processes. Based on innovative software, Axino Solutions designs, implements, and operates comprehensive IT solutions in the areas of Enterprise Service Management (ESM), Enterprise Asset Management (EAM), and Mobile Solutions, as well as International Carrier Business Support Systems. Axino Solutions' customers includes well-known representatives from telecommunications, industry, automotive, transport & logistics, trade & services, healthcare, and public administration sectors.

S&T AG has around 6,000 employees in more than 30 countries worldwide and is one of the leading European providers of IT services and solutions. The technology group's range of services includes data center operation, workplace management, managed printing, procurement, integration and maintenance of IT products, SAP operation and implementation, and software development.

About Berger-Levrault:

The international software publisher assists private and public professionals in meeting increasing demands in terms of performance and transformation of their business. With 51,000 customers worldwide and 2000 associates in Europe, Morocco, and Canada, the Group focuses on municipalities and local administrations, health and social welfare facilities, the hospital sector, businesses, industry, and education. Its ambition: To have its users reap the benefits of the massive potential of the digital world through service platforms at a time of large-scale access to data and intelligent interfaces. In 2020, the Berger-Levrault Group (head office in Boulogne-Billancourt, Paris) generated revenues of €172 million, of which 20% outside France.

CARL Berger-Levrault subsidiary:
In May 2018, CARL Software, a leader in equipment, asset, and maintenance management solutions (CMMS - EAM - TPM), joined the **Berger-Levrault** group and became **CARL Berger-Levrault.**
As a European leader supported by a global network of distributors, CARL Berger-Levrault has more than one thousand clients worldwide.

A software offering to meet the needs of major business sectors

CARL Berger-Levrault offers the **CARL Source** software in 5 field-specific versions perfectly suited for asset management in major areas of activity:

- CARL Source **Factory**: Industrial equipment and general resources.
- CARL Source **Facility**: Buildings, equipment and technical infrastructure.
- CARL Source **City**: Asset management, infrastructures, public networks.
- CARL Source **Transport**: Rolling stock, fixed and linear installations
- CARL Source **Healthcare**: Technical and biomedical equipment.

Innovative solutions to meet the challenges of maintenance 4.0:

Digital conversion of maintenance processes thanks to 3 mobile applications:

- CARL **Touch:** Mobile CMMS for technicians and inventory managers.
- CARL **Xpress**: Application for managing maintenance reports in just a few clicks.
- CARL **Flash**: Application for service requests from the general public.

Graphical integration and interaction:

- **CARL Maps - CAD**: equipment and assets displayed as maps.
- **CARL Maps - GIS**: mapping and geolocation of equipment, networks, buildings, infrastructures.
- **CARL Maps – BIM & CIM:** Integration of 3D models (buildings, infrastructures, networks) in CARL

Deployment of predictive maintenance:

- **BL Predict – IoT platform dedicated to maintenance**: leverage field data (connected objects and machines), analyze failures, propose appropriate maintenance actions, and anticipate wear and tear and breakdowns.
